

## Mid-East Prophecy Update – March 11<sup>th</sup>, 2012

- Last week, I had mentioned to you that I would pray about doing a Prophecy Update on the uncanny timing of natural disasters here in the U.S.
- Because of the recent devastating tornadoes, I think we'd be grossly remiss to not revisit its connection to our foreign policy concerning Israel.
- I have to confess that throughout the week I was a little uncertain as to whether or not I would talk on this today, but it was confirmed on Friday.

- It began early Friday morning when I was woken by thunder and lightening, the likes of which I had never seen since living here on the Island.
- Then, as I was drinking my morning coffee and watching the news, my wife tells me that the loud noise we're hearing actually get louder, is hail.
- In disbelief I looked out the window. To my astonishment I saw golf ball sized hail hitting the ground right before my now very wide-awake eyes.

- I want to come back to this at the conclusion of our update, because I think that there may even be a connection to what's happening in Hawaii.
- So, for now, I think that it's incumbent upon me to preface what we're about to see with both a qualification and a clarification related to all this.
- First, I'm not going to tackle the touchy topic of global warming for a number of reasons not the least of which is, it's been proven to be a hoax.

- Second, though global warming is now being dubbed a global conspiracy, I will be talking about "climate change," from a Biblical perspective.
- Third, this should no way be misunderstood to say that Christian's should not be concerned for both our environment and or, our great country.
- Fourth, I'll be quoting in part from two sources, "God's Final Warning to America," by John McTernan; and "Eye to Eye" by William Koenig.

- Fifth, it's crucial we continue to pray for, and reach out to, those affected by that which represents horrific human suffering and tragic death tolls.
- Lastly, it's imperative that you be as the Bereans were, searching the scriptures for yourself in order that you may know what the truth really is.

- Now, having said that I'll begin by drawing your attention to a couple of things that deal with "climate change" which is blamed for this weather.
- Rather than calling them "natural disasters," I would suggest to you that they may actually, in fact, really be "supernatural disasters," instead.
- Furthermore, these disasters may not be just "Acts of God," as much as they're "Acts by God," removing His blessing, which brings the curse.

**Genesis 12:1-3 NIV** The LORD had said to Abram, "Leave your country, your people and your father's household and go to the land I will show you. (2) "I will make you into a great nation and I will bless you; I will make your name great, and you will be a blessing. (3) I will bless those who bless you, and whoever curses you I will curse; and all peoples on earth will be blessed through you."

- In other words, those nations who bless Israel, God will in turn bless, and those nations that curse Israel, God in turn will curse them as well.
- Here's the question; "are these supernatural disasters an 'Act by God' allowing a curse to come down upon us, instead of a blessing upon us?"
- For the answer to this question, please consider how these major disasters coincided with the U.S. pressuring Israel to give up her land.

**1. October 30, 1991:** Then President George Bush senior opens the Madrid Conference with an initiative for a Middle East peace plan involving Israel's land. On the same day, an extremely rare storm forms off the coast of Nova Scotia. (It was eventually tagged "The Perfect Storm," and a book and movie were made about it.) Record-setting 100-foot waves form at sea and pound the New England Coast, even causing heavy damage to President Bush's home in Kennebunkport, Maine.

**2. August 23, 1992:** The Madrid Conference moves to Washington D.C. and the peace talks resume, lasting four days. On that same day, Hurricane Andrew -- the worst natural disaster ever to hit America at that time produces an estimated \$30 billion in damage leaving 180,000 homeless in Florida.

**3. January 16, 1994:** Then President Bill Clinton meets with Syria's President Hafez el-Assad in Geneva. They talk about a peace agreement with Israel that includes giving up the Golan Heights. Less than 24 hours later, a powerful 6.9 earthquake rocks Southern California. This quake, centered in Northridge, is the second most destructive natural disaster, at that time, to hit the United States, behind Hurricane Andrew.

**4. March to April 1997:** The combination of PLO Chairman Yasser Arafat touring America and Clinton rebuking Israel for not giving away her land for peace coincide with some of the worst tornadoes and flooding in US history. On the very day Arafat lands in America, powerful tornadoes devastate huge sections of the nation, ripping across Texas, Arkansas, Mississippi, Kentucky and Tennessee. Arafat's American tour also coincides with the storms in the Dakotas, which result in the worst flooding of the last century, in addition to weeks of major storms throughout the Midwest. Arafat finishes his tour and leaves the US and the storms stop.

**5. September 27-28, 1998:** Then Secretary of State Madeleine Albright works on the final details of an agreement in which Israel will give up 13 percent of Yesha. The same day Hurricane Georges slams into the Gulf Coast with 110 mph winds and gusts up to 175. The hurricane hits the coast and stalls. On September 28, Clinton meets with Arafat and Netanyahu at the White House to finalize the land deal. Later, Arafat addresses the United Nations about declaring an independent Palestinian state by May 1999, while Hurricane Georges pounds the Gulf Coast causing \$1 billion in damage. At the exact time Arafat departs the US the storm begins to dissipate.

**6. October 15-22, 1998:** On October 15, 1998, Yasser Arafat and Benjamin Netanyahu meet at the Wye River Plantation in Maryland, to continue the talks which ended on September 28. The talks are scheduled to last five days with the focus on Israel giving up 13 percent of Yesha. The talks are extended and conclude on October 23. On October 17, awesome rains and tornadoes hit southern Texas. The San Antonio area is deluged with 20 inches of rain in one day. The rains and floods in Texas continue until October 22 and then subside. The floods ravage 25 percent of Texas and leave over one billion dollars in damage. On October 21, Clinton declares this section of Texas a major disaster area.

**7. May 3, 1999:** This is the same day in Israel that Yasser Arafat is scheduled to declare a Palestinian state with Jerusalem as the capital. The declaration is postponed to December 1999 at the request of President Clinton, whose letter to Arafat encourages him for his "aspirations for his own land." He also writes that the Palestinians have a right to "determine their own future on their own land," and that they deserve to "live free, today, tomorrow and forever." That same day, starting at 4:47 pm CST, the most powerful tornado storm system ever to hit the United States, to date, sweeps across Oklahoma and Kansas. The winds are clocked at 316 mph the fastest wind speed ever recorded.

**8. August 29, 2005:** Exactly one week after Israel's Prime Minister Ariel Sharon completed the forcible eviction of Jewish settlers from the Gaza Strip hurricane Katrina struck the states of Louisiana, Mississippi and Alabama with a destructive and catastrophic force. 80% of the entire city of New Orleans was left under water. Many weather experts called this the worse hurricane and natural disaster that has ever hit this country. President Bush supported Sharon's evacuation from Gaza. In April 2005 Bush and Sharon met in Crawford, Texas where Bush praised Sharon for his "strong visionary leadership" in initiating the Gaza withdrawal, known as the disengagement plan. "I strongly support his courageous initiative to disengage from Gaza and part of the West Bank," he said, referring to the withdrawal of more than 8,000 Jewish settlers from Gaza and four isolated West Bank settlements."

**9. August 24-25, 2008** - The U.S. tornado season began in early January at the time of President Bush's preparation for his trip to Israel. In 2008 there was a total of 2,127 tornadoes through November .. the most-ever recorded in one year. The 2008 Atlantic Hurricane Season produced a record number of consecutive storms to strike the United States. ...For the first time on record, six consecutive tropical cyclones (Dolly, Edouard, Fay, Gustav, Hanna and Ike) made landfall on the U.S. mainland. ...Hurricanes "Gustav" and "Ike" developed into two of the costliest ... record-breaking hurricanes in U.S. history. Gustav began on August 24th and came ashore on September 2nd. Ike began on September 1st and came ashore on September 13th. This coincided with the exact time that Secretary of State Condoleezza Rice was in Jerusalem pressing Israel to sign a document by the end of the year that would divide Jerusalem by offering the Palestinians a stake in Israel's capital city as well as in the West Bank and Gaza Strip, ...The day Rice arrived in Jerusalem, a tropical depression began and quickly developed into Hurricane Gustav.

**10. May 2011** - Within a matter of hours, the U.S. President Barack Obama, for the first time in U.S. history, declares that Israel should return to its pre 1967 borders, a single tornado rips through the town of Joplin, Missouri claiming a death toll of over 135, dubbing it the deadliest single twister in the history of the United States of America. This tornado season will go into the history books breaking all previous records of tornados striking this nation. As one suggested; "they ripped through the heartland of America, because America ripped the heart of God by touching the apple of His eye, Israel."

- One might argue; disasters don't just hit the US, they happen to other nations all over the world like that recent mammoth earthquake in Japan.  
- I want to be sensitive to the Japanese constituency as part of our population in Hawaii, but there's something you should know about Japan.

**March 11th, 2010** – Statement by Press Secretary and Ministry of Foreign Affairs, on the decision of the Government of Israel regarding the construction of housing units at settlements in West Bank including East Jerusalem - "The Government of Japan deplores the decisions of the Government of Israel to give permission for the construction of 1,600 housing units in East Jerusalem in addition to 112 units in West Bank. The Government of Japan does NOT recognize any act that prejudices the final status of Jerusalem and the territories in the pre-1967 borders."

**March 11th, 2011** - One year to the day, one of the most powerful earthquakes in recorded history unleashed a devastating tsunami, and moved the main island of Japan by 8 feet, shifting the Earth on its axis. Also, this declaration by Japan was restated on October 11, 2010, just five months to the day, and then again on January 11, 2011, exactly two months to the day, of what would become the fourth most powerful earthquake ever recorded in history, with a magnitude of 9.1, not to mention the unprecedented tsunami that followed, the likes of which had never been seen in recent memory.

**March 2nd, 2012** - The U.S. is once again hit by record breaking Tornadoes. Never before have this many hit, in these places, and at this time. These numerous and enormous tornadoes come on the heels of Obama making it very clear, in no uncertain terms, that Israel is on her own as it relates to Ahmadinejad's nuclear Iran. The take away from Obama and Netanyahu's speeches at AIPAC, and their meeting at the Whitehouse was that Israel will defend itself, by itself.

**March 9th, 2012** - Just this last Friday, we here in Hawaii are completely blindsided by powerful unexpected storms, slamming the windward side of Oahu, and the Island of Kauai with us, with hailstones never seen before in our tropical paradise. I find it most interesting that this would coincide with the United States Defense Secretary Leon Panetta's arrival here on Oahu to discuss our military's role concerning Damascus Syria.

Here's a quote from one news source reporting on Panetta's visit; "Secretary of Defense Leon Panetta put on a smile just a day after testifying about the United States' plans to help the people of Syria."

- I'm keenly aware at first glance this quote may seem nebulous and meaningless however, notice he says we plan to help the people of Syria.  
- Now, listen to this quote from Obama, last Sunday as he ended his speech at AIPAC, which is the "American Israel Public Affairs Committee."  
- "Thank you very much, everybody. God bless you. God bless the people of Israel. God bless the United States of America." (Barak Obama)

- By the way, let me go on record and say, as a "so called Palestinian" who was born there, Israel was never to be a State Israel is to be a Nation.  
- God did not promise Abraham that He would make him into a great State, God promised Abraham that He would make him into a great nation.  
- Please do not be amongst those who are deceived and believed this "Two State Solution," because to do so is to create a "One State Problem."

- I would suggest that this is a subtle, yet satanic distinction that's being made between the nation, (not state) of Israel, and the people of Israel.  
- The reason this is so significant is that replete throughout the pages of Holy Writ, prophecy after prophecy, describes exactly this as happening.  
- In the very last day, all of the nations of the earth will be gathered against Israel concerning the dividing of her eternal capital, Jerusalem.

**Zechariah 12:(3), (9) NIV (3)**, On that day, when all the nations of the earth are gathered against her, I will make Jerusalem an immovable rock for all the nations. All who try to move it will injure themselves. ... **(9)** On that day I will set out to destroy all the nations that attack Jerusalem.

**Obadiah 1:15 NIV** "The day of the LORD is near for all nations. As you have done, it will be done to you; your deeds will return upon your own head.
